

# PROTECT WHAT MATTERS MOST

Primex OneVue Sense™ helps protect your facility and valuable assets while improving safety and patient care. Set custom threshold and alerting parameters to continuously monitor conditions throughout your facility, and be notified by text message, phone call, or email to address out-of-range alerts. Primex OneVue Sense keeps comprehensive monitoring data and reports at hand for easy access, especially when you need to demonstrate compliance with regulatory guidelines and requirements.

“

Peace of mind. I think that is the biggest difference when it comes to using the OneVue temperature monitoring solution. It just feels more comfortable knowing that the vaccines, insulin, and all of the other refrigerated medications are in a good condition even when we aren't there.

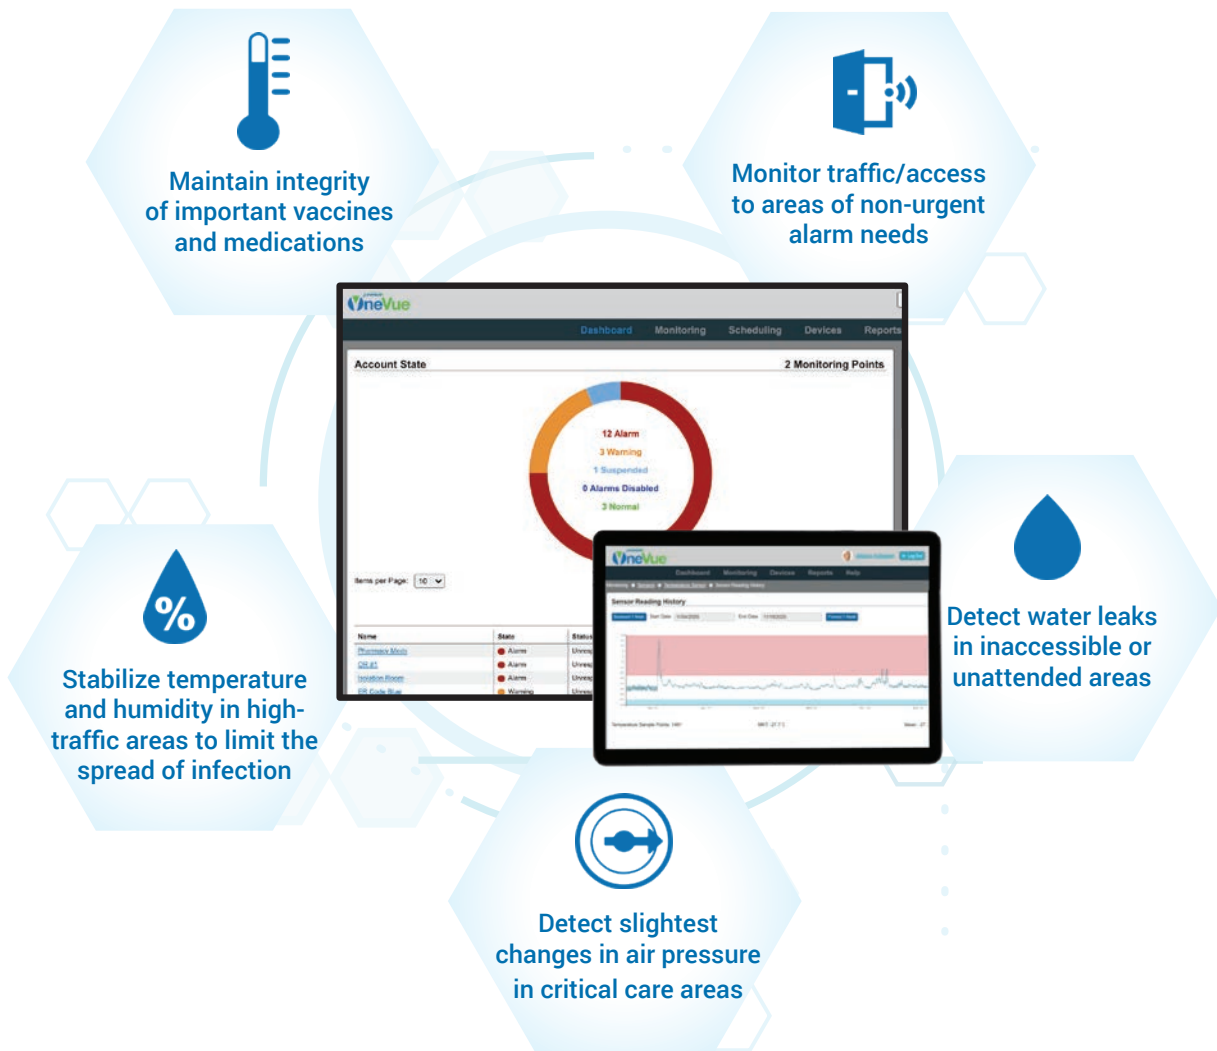

HASHIM ZAIBAK, PHARMD, OWNER OF HAYAT PHARMACY

”

# KNOW YOUR ENVIRONMENT

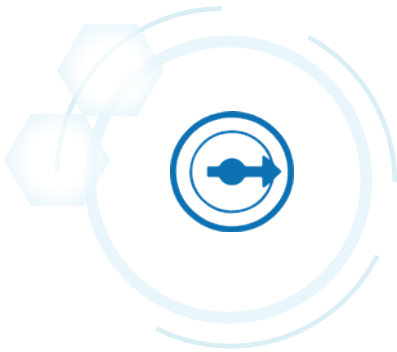

Continuously track and store data into the cloud-based OneVue software platform, which requires minimal input or management by the IT department. Through customizable alerts and reports, always know what is happening in your facility – anytime, anywhere.

“ This was literally plug and play. It definitely took a big job off of not only me, but also off the nurses, who are in exam room after exam room. It's nice to be able to go online and see if there's something wrong, especially when you're not even physically there. ”

JOEL WHITE, IT DIRECTOR, ALLIES FOR HEALTH AND WELL-BEING AFTER INSTALLING PRIMEX ONEVUE SENSE TEMPERATURE SENSORS

# Primex OneVue Sense™ VALUE AS CUSTOMERS SEE IT

Quick response to pandemic needs; peace of mind knowing you will be notified immediately if an environment goes into an alarm state.

— said one East Coast Hospital

“We had a water leak that caused hundreds of thousands of dollars in hospital damage, which delayed and canceled some patient treatments. Now, with OneVue, we’ve had two events in which the sensors have allowed us to stop a leak. They detected a small amount of water, and we were able to take the necessary steps to prevent more damage.”

— said one Midwestern Hospital

“The OneVue system has saved thousands, maybe tens of thousands of dollars in medical product, especially since we know what’s happening before a refrigeration unit goes bad. On a single refrigerator, we probably saved \$11,000 just on the vaccines that were in there.”

— said Kossuth Regional Health Center

## Automation Improves Operational Efficiencies and Patient Care

Manual processes are  
**TIME-CONSUMING,**  
**ERROR-PRONE,**  
and **COSTLY**

**86% of MISTAKES**  
made in the healthcare industry  
**= Administrative**

[www.himss.org](http://www.himss.org)

**91%** of HC Practices are using  
cloud-based services

**47%** of **NOT CONFIDENT** data  
is **secure** due to manual  
workflow process

[www.entechus.com](http://www.entechus.com)

roughly **25%** of  
U.S. hospital spending  
**= administrative costs**

“ If I have to check anything temperature-related, I just take out my cell phone and log into the portal. Plus, whenever someone comes in for an audit or site visit to check in on our compliance, we can definitely show them that everything is under control. ”

KEVIN XING, DISTRICT MANAGER AND HEAD PHARMACIST, HAYAT PHARMACY

### WE PROVIDE THE ASSURANCE YOU NEED TO MINIMIZE STAFF BURDEN

OneVue Sense™ helps ensure your facility is operating efficiently, effectively, and in compliance, giving your staff peace of mind while enabling them to focus on patient care and safety.
