

## ConnectedSafety<sup>+</sup>

The future of life & building safety

## LEAVE NOTHING TO CHANCE

Introducing Edwards ConnectedSafety+, a cloud-based Software as a Service (SaaS) solution that provides your Edwards partners with a secure, remote connection to your Edwards EST4 intelligent fire systems. This solution includes access to periphery devices, such as detectors and notification appliances, to instantly provide a comprehensive view of your connected site(s) for an enhanced fire system experience.

# EMPOWER YOUR PROTECTION

## PROACTIVE SERVICE

Technicians can prepare for service calls more efficiently, reduce probability of return visits and eliminate site disruptions with access to real-time diagnostics and insights before arriving on-site.

## PREDICTIVE MAINTENANCE

With digitally optimized, cloud-based monitoring, Edwards partners are empowered to reduce the total cost of ownership by predicting and preventing issues before they occur.

## FEWER DISRUPTIONS

Reduced nuisance alarms and more streamlined service calls lead to fewer day-to-day disruptions and reduced labor costs.

## PEACE OF MIND

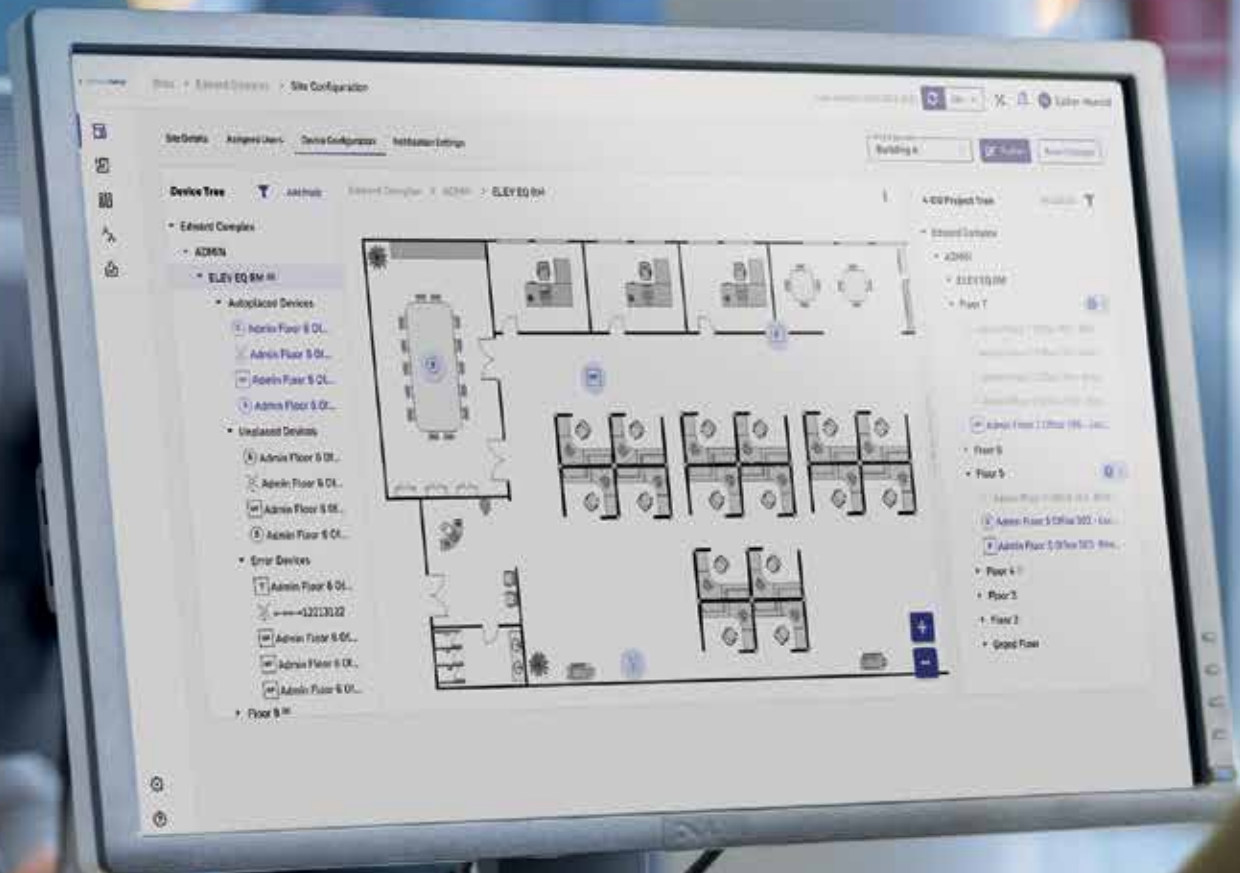

You can rest easy knowing Edwards ConnectedSafety+ has been customized to protect your entire facility and that your system is code compliant.

## CYBERSECURITY

Edwards ConnectedSafety+ is backed by the Carrier Global Product Cybersecurity Program. Edwards products and services are Secure by Design. Cybersecurity protocols are integrated from concept development to release, with ongoing evaluation of the security of the product.

# A CLOSER LOOK

## HELP YOUR SYSTEM SAFEGUARD PEOPLE AND PROPERTY

Edwards ConnectedSafety+ is your Edwards partner's direct window into your EST4 Fire and Life Safety system:

- Enjoy remote visibility into your facility's system
- Access compliance reports from anywhere
- Receive recommendations for improved performance

## TAKE A CUSTOM APPROACH TO MANAGEMENT

View only what you need to with an easy-to-use dashboard that allows you to:

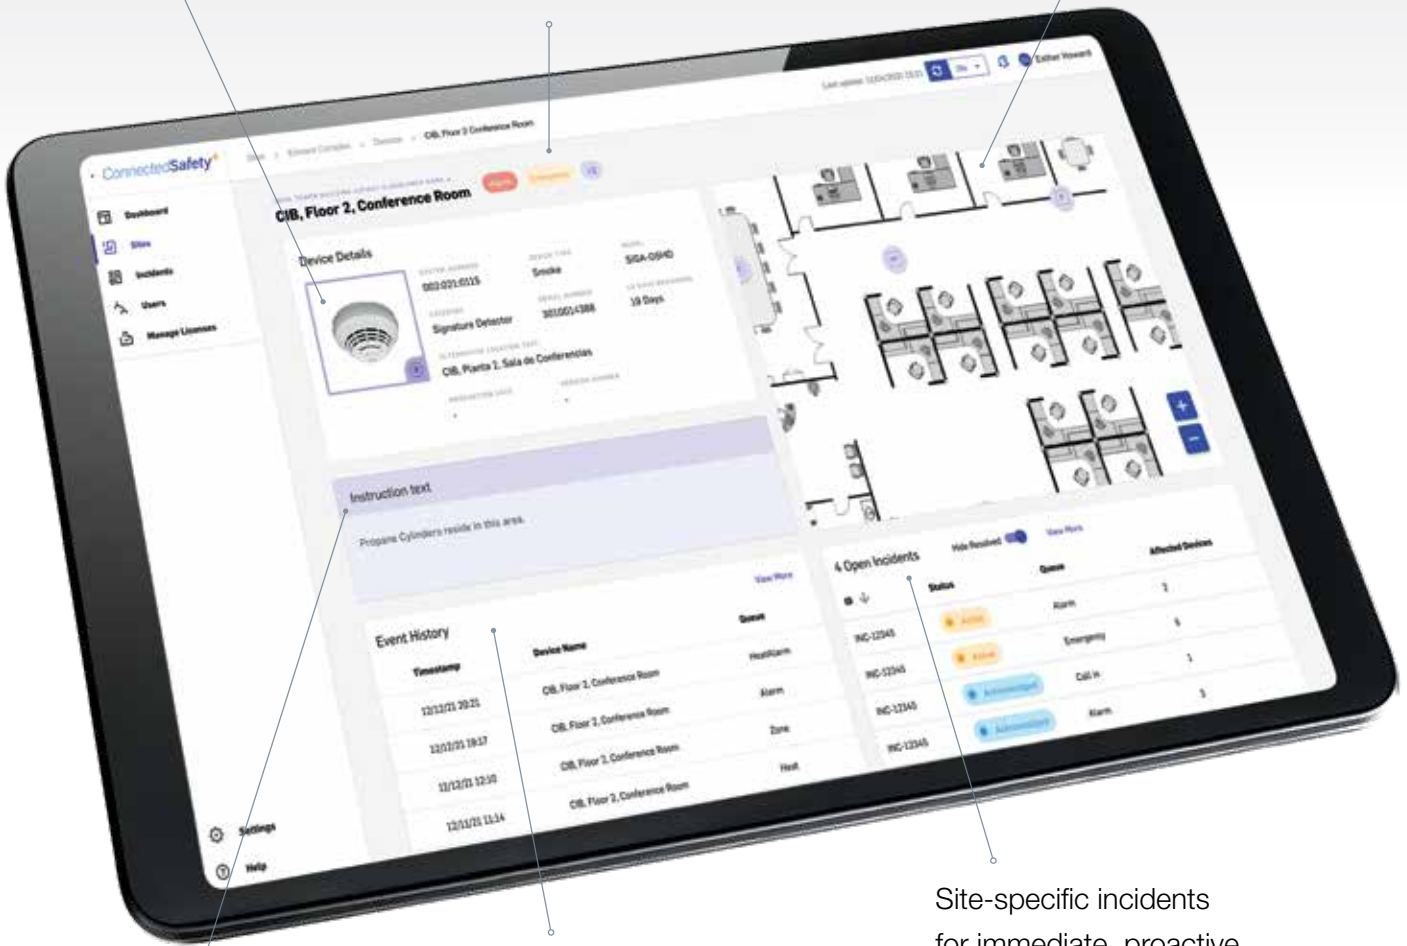

- Turn notifications on or off
- Filter views by event type, site and notification methods
- Access insights into the health and history of your fire system

# YOUR SYSTEM AT A GLANCE

Device level details including diagnostics, maintenance and percentage of dirty readings

Color-coded device status indicators to enable a quick response

Detailed facility floor plan, showing device locations

Important information about device locations

Quick-reference guide to past device events

Site-specific incidents for immediate, proactive responses

# FEATURES THAT MAKE A DIFFERENCE

## MANAGER+ DASHBOARD

The Manager+ Dashboard provides total peace of mind by offering a complete view of predictive maintenance and diagnostic reports to ensure that your facility is safe.

## FLOORPLAN+

The Floorplan+ feature automatically associates fire system devices in the site's floorplan with the system configuration, allowing you to see a bird's-eye view of your facility.

## INSPECTION+

Once Floorplan+ has been optimized, technicians can conduct a guided inspection with the Inspection+ feature which displays pass or fail and device status. This reduces overall inspection time for technicians, reducing labor needs and streamlining service visits.

## TECHSUPPORT+

The TechSupport+ feature offers you a new level of customized, connected support. This feature allows the Edwards support team to view your connected site system during support calls, and assist with accelerating on-site issue resolution through a digitally optimized experience.
